

## Wireframe-homepage

Contains system logo, dashboard title, and user profile

[View Profile](#)

GeoExtract focuses on functionality and user experience for geospatial feature extraction. The Header contains the system logo, dashboard title, and user profile. The Sidebar includes a navigation menu with options for different sections of the application. The Project Overview displays basic information about the current project. The Map View is an interactive satellite map showing the analyzed area, allowing users to zoom, toggle layers, and highlight detected features. The Feature List provides a table summarizing detected features, their counts, and confidence levels. Analysis Tools offer additional operations such as change detection, report generation, and data export.
